

Dedicated to innovation in aerospace

Advanced Laminar Flow Tailplane

- Structural demonstrator of a laminar flow compatible horizontal tailplane for business jet
- Superior surface quality to satisfy the stringent requirements for natural laminar flow
- Composite leading edge manufactured at NLR with advanced automated fibre placement technologies

This project has received funding from the Clean Sky 2 Joint Undertaking under the European Union's Horizon 2020 research and innovation programme under grant agreement No 714479
